# QSkill Internship

- **Domain:** Front-End Development (React, Tailwind)
- **Starting Date: 1st** April, 2026
- **Ending Date: 1st** May, 2026
- **Deadline For Task Submission: 1st** May, 2026
- **Do either slab 1 or slab 2.**

## ■ Slab 1 [ For Beginners]

✓ Create a text translator application using React, Tailwind that will take input as a string in english and it will help you to convert it in your favourite language. Use RapidAPI for implementing that feature.

✓ Create a basic React application that will help you to generate random strings. Please make sure that you have to use useState, useCallback & useEffect hooks for implementing that application.

✓ Create Client side routing using react-router-dom.

## ■ Slab 2 [ For Intermediate]

✓ Create the entire clone of Coding Ninja's website using React, Tailwind.
